

I am writing to express my concern about SB 1027. It appears to be another form of punishment for those on the sex offender registry and will further limit their ability to acquire jobs OR KEEP THEIR CURRENT JOB.

For example, if a sex offender worked in a machine shop and would not normally have contact with the public and that shop hired an intern (under 18) from a high school for the summer or a part-time employee (under 18) it appears that they would lose their job if this bill was passed in it's current form.

Many are on the registry for non-victim offenses or consensual relations or their crime was many years ago and they have not re-offended. There needs to be a way to move off the registry and that is currently not available. They need help to assimilate back into society, not further punishment.

thanks,
